OBJECTIVE

Passionate React JS developer with hands-on experience in building and deploying scalable web applications using the MERN stack. Adept at solving complex problems, collaborating in teams, and rapidly learning new technologies. Seeking to leverage skills in front-end development and API integration to contribute to a dynamic software team.

EDUCATION

Bachelor of Computer Applications

2019-2022

Akshara First Grade College, Anekal.

SKILLS

- ReactJS
- JavaScript
- HTML
- CSS
- TailwindCSS
- Redux-Toolkit
- NodeJs
- Express
- Bootstrap
- MongoDB
- RESTful APIs
- MySQL

PROJECTS

EXPENSE TRACKER ([GitHub Repository](#))

- Built a user-friendly expense tracking app, implemented **user authentication and authorization using JWT** for secure login, and protected API routes.
- Optimized backend with Node.js and Express, implemented RESTful APIs, and integrated MySQL for efficient data storage.
- Result: Enhanced user experience with fast, responsive front-end and real-time data updates using ReactJS and Redux Toolkit.

YUMEXPRESS ([GitHub Repository](#))

- Developed an online food ordering platform that integrated the Swiggy API for live restaurant data.
- Built responsive and intuitive UI components using ReactJS, ensuring cross-browser compatibility and a seamless user experience.
- Technology Used :- **ReactJs, JavaScript, TailwindCSS, Swiggy API (RESTful), JSON, Html**
- Result: Users can browse restaurants and place orders effortlessly, leading to improved customer engagement.

MAILBOX ([GitHub Repository](#))

- Designed and implemented an email management application using Firebase as a backend for real-time data sync.
- Integrated **Redux Toolkit for state management** and React Router for seamless navigation.
- Result: Increased app responsiveness and real-time updates of emails, improving user interaction with the mailbox.
